GAYATHRI V.

B.Tech in Artificial Intelligence & Data Science | Student & Developer

Email: gayathri03042@gmail.com | gayathriv.ad25@bitsathy.ac.in | Phone / Location: Tamil Nadu, India
GitHub: github.com/gayathri1328 | LinkedIn: linkedin.com/in/gayathri-v-443078390

EDUCATION

Bannari Amman Institute of Technology **2025 – 2029**
Bachelor of Technology - Artificial Intelligence & Data Science **Current CGPA: 7.28 / 10.0**
Relevant Coursework: C, C++, Python, Data Structures, DBMS, Problem Solving, AI/ML Foundations.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, SQL
- **Web Technologies:**HTML5, CSS3, JavaScript (ES6+), Responsive UI
- **AI & Data Science:** Machine Learning, Computer Vision (YOLO), NLP, Generative AI, RAG Systems
- **Developer Tools & Cloud:**Git, GitHub, VS Code, Supabase, Linux environment

FEATURED PROJECTS

Fourbidden Logic — Personalized Learning Resource Retriever (RAG / LLM)
Live Demo: fourbidden-logic2.onrender.com
- Built for INTELLIX LLM & AI Optimization Hackathon (Role: Team Leader).
- Architected semantic resource retrieval leveraging LLMs and RAG with Supabase vector storage for students.

SHENEX — 360° Intelligent Computer Vision Occupancy & Pattern Analysis
- Computer Vision pipeline using YOLO models to analyze 360° video, detect and track individuals in real time.
- Generates spatial heatmaps and dwell-time duration metrics to identify traffic bottlenecks in venue facilities.

NEXUS — Intelligent Freight Procurement Decision Support System
- AI decision-support engine answering: Which vessel? When? Which contract strategy? and Why?
- Formulated an 8-stage algorithmic pipeline: Data -> Forecast -> Feasibility -> Voyage -> Risk -> Cost -> Optimize -> Explain.

Study Buddy — Web-Based Student Productivity Dashboard
Live: whimsical-kleicha-f847de.netlify.app
- Designed and deployed responsive browser application helping students organize daily academic preparation.

FleetGuard AI — Heavy-Vehicle Telematics & Driver Safety System
- Conceptualized IoT telematics and driver fatigue monitoring architecture using edge computer vision cues.

HACKATHONS & LEADERSHIP

INTELLIX: LLM & AI Optimization Hackathon — Team Leader (Team: Fourbidden Logic)
- Led technical design, scoping, and prompt/retrieval integration under intensive hackathon conditions.
